Tomatoes

A packet of seed produces about 150 plants; 1 oz. about 2000 plants; ¼ lb. per acre. Tomatoes contain lots of nitrogen; go easy with fertilizer on the plant bed.

Queens (New). Large, Remarkably Solid Fruit.

Pkt., 20c; ½ oz., 60c; oz., \$1.10; ¼ lb., \$3.00 (75 days.) This new second-early Tomato is the result of a cross between Valiant and Rutgers and ripens midway between them. The large smooth fruits are unusually solid and firm with thick walls, small seed cavities and meaty interiors. Mild in flavor, sweet and very delicious to eat, Queens will be specially popular with home and market gardeners, and seems well adapted for green wraps. Although somewhat open in growth, the vines are vigorous and yield well.

888 **Stokesdale. Good Yields—Fine Fruit.**

Pkt., 15c; ½ oz., 50c; oz., 90c; ¼ lb., \$2.50 (70 days.) Well adapted for home use, market and canning, Stokesdale is a second-early type bearing heavy crops of deep globe-shaped fruit. The Tomatoes are medium in size, smooth as an Apple, with scarlet color and firm red flesh of fine quality. A dependable and well-known variety. We are proud to offer Certified seed.

846 **Bounty** Pkt., 20c; ½ oz., 75c; oz., \$1.25; ¼ lb., \$3.50

870 **Sunray** Pkt., 15c; ½ oz., 65c; oz., \$1.10; ¼ lb., \$3.00

(80 days.) (New.) Wilt-Resistant Jubilee Type. Their sweet mild flavor and handsome appearance have won many gardeners to the yellow-orange Tomatoes. Sunray is resistant to fusarium wilt and is superior even to Golden Jubilee, which it replaces. It produces large yields of fine, smooth fruit, very firm and solid.

884 **Pritchard** Pkt., 15c; ½ oz., 55c; oz., 90c; ¼ lb., \$2.50

(Certified Seed.) Gold Medal Winner. (78 days.) It is fusarium and nail-head-rust resistant, has a vigorous vine and smooth, deep red, thick-walled meaty fruit. It's a good table Tomato, a good canner, and a good slicer, well adapted to your home garden.

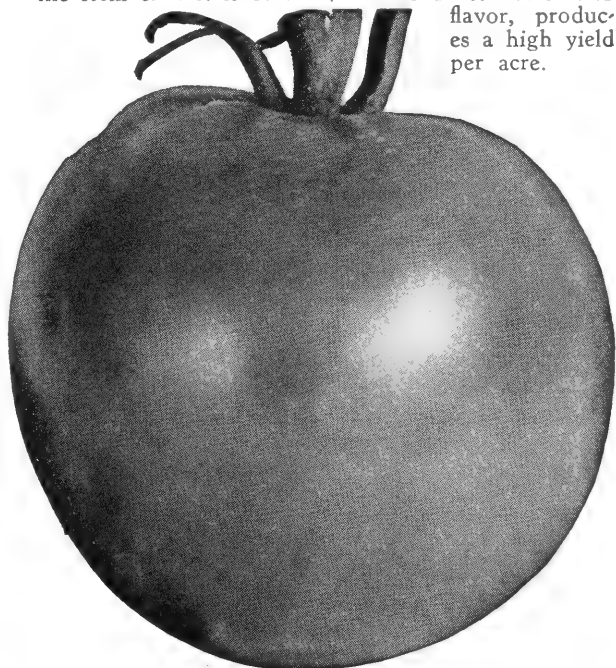

873 **Marglobe** Pkt., 10c; ½ oz., 50c; oz., 80c; ¼ lb., \$2.50

(Certified Seed.) (77 days.) This highly developed strain of Marglobe is justly acclaimed by leading planters as the MOST OUTSTANDING TOMATO EVER DEVELOPED. Is noted for its extreme solidity, deep globe type and productivity as well as its disease resistance—being exceptionally vigorous and healthy. Ripens a beautiful scarlet-red, well up to the stem—profitable for gardeners and shippers.

886 **Rutgers** Pkt., 15c; ½ oz., 55c; oz., 90c; ¼ lb., \$2.50

(Certified Seed.) (80 days.) This is being used very extensively in Ohio and Michigan. It produces well on soils low in nitrogen. It maintains the size of its full fruit throughout the picking season. Similar in shape to Marglobe, except that they are more flat on the stem end. It is of exceptional red flesh color and

flavor, produces a high yield per acre.

Holmes' OHIO SEED CORN

Wonder 255 Here is indeed a wonderful Corn. We think it is the grandest corn ever produced. Big ears, long, 18 to 22 rows of deep grain. The foliage is **very dark green**, and retains this color when the ears ripen. As to **heat and drought resistance**, it is not surpassed by any other. It's **borer resistant**. Its strong stalk and good roots make it stand best of all. It is adapted to a wide range of soils from poor to high and for northern states where yields have been consistently very high. Matures medium early, **100 days**. We highly recommend that you grow a crop of this our **Wonder 255**. **Large flat kernels.**
 Bu., \$9.00; 2 bus., \$17.50

HOLMES' EARLY 90-DAY. Has broad, deep grains of a beautiful golden yellow color. It produces a crop of the most perfectly uniform ears and has averaged 70 bushels of shelled Corn per acre. Holmes' Early matures in 90 to 100 days. The ears are 10 inches long with 14-16 rows of long, broad grains. The stalks grow from 8 to 10 feet high, giving an immense quantity of fodder. Farmers who planted Holmes' Early 90-Day for their main crop told us they grew one of the finest crops and best quality Corn.

Not a Hybrid Corn: 2 lbs., 70c; pk. (14 lbs.), \$2.00, postpaid. Not paid, bu., \$6.00; bag (2 bus.), \$11.50

U. S. 13 The most grown full-season hybrid yet developed. Strong stalk and roots, resists disease and insects and has high general vigor and wide adaptation for production of both grain and ensilage. On the average U. S. 13 out-yields all competing varieties. Bu., \$8.50; 2 bus., \$16.50

OHIO HYBRID M15 The outstanding hybrid yet developed for midseason grain production. Stiff stalk, strong roots, good resistance to disease and insects. Ear medium sized with deep, smooth kernels. It dries out quickly in the fall and husks clean and easily by hand or with mechanical pickers. Yield is tops in its season.
 Bu., \$8.50; 2 bus., \$16.50

OHIO HYBRID W64 This hybrid is making a reputation for itself all over Ohio. The plant is a very stiff-stalked kind which is most resistant to root lodging. Ohio W64 has shown excellent resistance to both Corn borer and blight. It is worthy of all the dependence you care to put in it, produces results.
 Bu., \$9.00; 2 bus., \$17.50

OHIO HYBRID K62 CORN BORER AND BLIGHT RESISTANT
 This is one of the new early hybrids which has out-yielded most other kinds in its maturity class. It matures earlier and has outyielded K24 by 5 or 6 bu. per acre. In addition it carries less moisture at harvest time. It will stand well even late into the fall. It is resistant to both leaf blight and corn borer. This promises to be the best, highest yielding early hybrid Ohio has yet introduced. The seed is hard to produce and thus the higher price. The increase in yield and resistance to disease is worth many dollars to you.
 Bu., \$9.00; 2 bus., \$17.50

CERTIFIED SEED is checked in the field and in the bin for purity and quality. **The cost of quality seed is very small compared to increased yields.** Don't take chances with unknown seed.
